

Floating Shelf

Suggested Installation Information

2-1/4" Shelf

3" Shelf

1. Cut hanger strip to length and height from a straight 2 x 4 .
2. Hanger strip length = shelf width minus 2".
3. Measure recessed area height in back edge of shelf and cut hanger strip height to a "slide on" fit.
4. Fasten hanger strip securely to each stud in the wall as shown.
5. Slide shelf onto hanger strip.
6. With shelf level, scribe or fit to wall if necessary.
7. Lift front of shelf level or slightly above level and pre-drill holes as illustrated. (Suggest 1 screw per lineal foot of shelf)
8. Run screws into shelf and hanger strip.
9. Maximum recommended weight capacity is 5 lbs. per lineal foot.
